1 CHOOSEN SCENARIO

State which scenario you have chosen as an individual.

1.1 Why was the scenario chosen?

State here, for 5 marks, in full sentences, why have you chosen this specific scenario.

I have chosen this specific scenario because growing up I have been interested in gaming and just being a gamer, I got my first console when I was 4 years old playing games like Midnight club, Need for speed, WWE (World Wrestling Entertainment) and FIFA 08,09 so this scenario gives me a chance to work on something that's modern and practical so I feel like I can relate to it more. It also involves creating both a website and mobile app which connects me to mobile application and web development. The scenario also has features which include bookings, events etc and I come from a business background so that gives me a chance to show my creativity and development skills.

2 WHO IS THE CLIENT?

State here, with aid from your XHAW5112 module manual, who is your client

2.1 What does the client want?

My client's name is Jason Naidoo which is an avid gamer which wanted to create a modern entertainment venue where gamers of all ages could enjoy the latest gaming technology, compete in esports tournaments, and socialise with friends. He noticed that many gamers lacked access to high-performance gaming equipment and organised competitive events, so he established an arena that caters for casual players, competitive gamers, schools, and corporate events. This is going to include discounts for specific bookings :

One booking - no discount

Two bookings - 5% discount

Three bookings - 10% discount

More than three bookings - 15% discount

and Gaming packages which include

- Ultimate Gamer Pass

- VIP Gaming Experience
- Esports Training Package
- Birthday Party Package
- Individual Experiences
- Virtual Reality Experience
- Racing Simulator Challenge
- Escape Room Challenge

3 USER-CENTRED DESIGN

3.1 What is user centred design?

Explain clearly the definition for user-centred design

User centred design is an approach and design that puts users first and focuses on understanding the users needs, environment and preference and how they experience the product. It works as a repetitive process where designers include every users needs in every stage of the development process to make sure that the product is accessible and meets the needs of the user

3.2 Why would you use user centred design?

Name atleast 2-3 three reasons why would we use. In full sentences please.

Improves user satisfaction – Helps users create simple navigation and gives clean and proper layouts and features that users can understand without confusion

Creating wireframes – wireframes that are used to plan structure and functionality

4 COLOUR PALLET

4.1 Chosen Colour Pallet

Please add the colour that you, individually had chosen.

Red and black

4.2 Explanation of the Colour Pallet

Add a descriptive explanation to why you have chosen these colours.

I chose these colours because red and black because they have been my favourite colours since I was a kid black gives you a modern colour, high tech and professional feel because its basic and the red represents energy and action colour and together tghey give you a bold and powerful colour scheme

5 LOGO DESIGN

5.1 Chosen Logo Design

Place the logo here please

5.2 Logo Explanation

The logo explains the next level gaming and esports arena which shoes competition and modern gaming ideas meaning the controller shows the business is focused on gaming and Esports and the crown explains the winning and being on top which connects the idea of “next level” the shield shows that the logo a strong and completive

appearance the colours show modern, premium feel and the NEXT LEVEL mainly focuses on the progress, achievement and taking gaming to a higher place

6 REFERENCE LIST

Type your references here in alphabetical order

Add all references you have used.

Follow the referencing guide

If you need any referencing help, please make sure you book a session with the Integrity Officers or ask your lecturer.
